

761CT 75mm Video Tripod

The E-IMAGE 761CT tripod is made from carbon fiber and feature four sections. The legs feature locks on each section. This allows you to individually adjust the height of each leg, making it perfect for stabilization on uneven ground. The feet also have retractable spikes for soft ground and rubberized feet for more hospitable locations. The 761CT can hold up to 20kg (44lbs), has a locked maximum height of 170cm, a minimum height of just 13cm, and a 75mm bowl for mounting a video tripod head.
